FullStack Developer with 3 years of experience in Design and FrontEnd Development. I work on apps that process large volume of data from backend to get immediate and efficient results, in the Municipality of Moron and Inteligentia. Also, I am a Javascript tutor teacher at Coderhouse. I appreciate learning new technologies opportunities and professional growth.

EXPERIENCE

Inteligentia – Front End React Developer — *February, 2022 - current*
- I manage to develop complex views which works with multiple endpoints to configure user's tasks and graphs.
  Tech stack: React JS, SQL, Dashboards, ApexCharts, Websockets.

Coderhouse – Javascript tutor teacher — *June, 2022 - current*
- I achieved 90% of the students understanding of complex topics during the complementary classes through didactics designed from the practical activity.
  Tech stack: Javascript.

TECHO - Front End React Developer — *May, 2022 – January 2023*
- I developed complex views of the Frontend that facilitate multiple tasks for users, and I helped in the coordination of the interns, providing support in their tasks and difficulties.
  Tech stack: React JS, Javascript, Material UI, Git, Github, Node JS, Express, GSAP, React chart js, GIT.

Municipality of Moron - Front End React Developer – Backend Node Js — *May, 2020 - current*
- I reduced 90% the time of processing large volumes of data. I optimized the health worker's daily tasks and helped speed up the implementation of specific actions.
- I designed and developed an app that analyzes data on different diseases in the population and allows authorities to make relevant and timely decisions.
  Tech stack: React JS, Javascript, CSS, Typescript, Node JS, Express, GSAP, React chart js, R, Figma, GIT, Dashboards.

MAIN PROJECTS

Sweet Expectancy App – http://dulce-espera.vercel.app - 2022
- It allows physicians to get drug information related to pregnancy from the FDA.
Tech stack: React, Typescript, API REST, Figma.

The lupines e-commerce – https://ecommerce-reactlustres.vercel.app - 2022
- This e-commerce helped the micro-enterprise to raise its sells a 100% during the first month.
Tech stack: React, Javascript, Firebase, CSS.

SKILLS

Programming Languages: Advanced: Javascript; Intermediate: Typescript.
Frameworks Tools: Advanced: React JS, SASS; Intermediate: Node JS, Express JS, Next JS. Basic: Nest Js
Data Base: Intermediate: Mongo DB; Basic: SQL.
Tools: Git, Github, Figma, Photoshop, GSAP, Jquery, ApexCharts.
Agile: SCRUM.
Languages: Upper Intermediate: English; Native: Spanish.

EDUCATION

Buenos Aires University – *Buenos Aires, Argentine. Medicine, may 2008.*

CERTIFICATIONS

React Native – Coderhouse. July, 2023.

Backend – Coderhouse. June, 2023.

Front End React Web Development Career – Coderhouse. May, 2022.

EF SET – B1 Upper Intermediate. March, 2022.
